

Main Features:

- The Equipment attached directly to the Front of the Windshield through the 3M Glue. Easy to install and simple operated. The installation time only need one-tenth of the traditional Mobile DVR to complete the installation.
- The Equipment is provided with the high reliability of the thermal design, which can monitor continually during the high degree environment about 70°.
- The whole industrial level program, system design and reliable electromagnetic compatibility design, to ensure stable work itself and the stability of the peripheral electronic equipment.
- The whole structure is designed for anti- tamper and dust-proof, to ensures preventing the SD, SIM card and antenna connectors from destroying.
- The whole module adopts the embedded plug structure. Not only meet the requirements of convenient dis-assembly , but also the conditions of vehicle vibration.
- Support IE browser preview and PAD or phone APP real-time preview function(Extensible)
- The Equipment integrated one 1080/720p Camera. Meanwhile, it can be expanded to other 3 three 1080P AHD Cameras(2.3 and 4 Channels).
- Integrated infrared light for internal can achieve High definition surveillance under the condition without light.
- The viewing angle of 1CH camera built in can be adjusted flexibly. the camera can achieve a vertical horizontal direction of all-round monitoring angle adjustment according to the monitoring angle requirements of different types of vehicle(can be locked completely through its structure after adjustment finished, the monitoring angle of view can't be changed).
- Integrated Microphone (Inside Car Audio Record)
- Integrated Speaker (Audio Broadcast and Early Warning)
- Carry 6 Status Indication Light (Survey Equipment Work status)
- Integrated One Alarm Button, One On-off Button and One WIFI Toggle Button(AP and Station mode by hand)
- Build-in Bluetooth module for optional (support wireless alarming and capture by wireless Bluetooth button, headset Intercom and telephone function)
- Build-in WIFI for optional(Achieved automatic uploading and smart phone connection function. The AP function achieve 5 external devices shared internet
- Build-in GPS module and antenna (Achieved Management of Car Speed and route)
- Support Alarming Functions for the deviation of the routes and the entrance and the exit of an area. Support 16 routes and areas
- Integrated 3G/4G Module (Achieved Remote Audio and Video Transmission and Management
- Build-in G-sensor Module (Achieved automatic alarming upload about Abnormal Vibration, Overturning, Impact and Emergency Brake)

Modular Design Fast Maintenance, Low Maintenance Cost

Powerful functions

Display

Intergrate all what you can think of

GPS/GLONASS/BD Module built-in
Achieve speed, location, time and routine management
Achieve Speeding alarm, route deviation alarm and voice prompts

Professional Vehicle Power Design
Support 6-36V wide voltage power input
Reverse connection protection,
over-current & over-voltage protection
Applied well for all kinds of vehicles

Built-in 2 channels V4.0 Bluetooth Module
Achieve snapshot by one-key alarm
and intercom by earphone

Built-in G-sensor module
Support automatic alarm uploading when
abnormal vibration, rollover impact,
emergency brake etc circumstances happen

Built-in ultra power capacity
Support 6-36V wide power input
The device of itself can work 6-8S after abnormally powered off
Make sure data no lost, disk no damaged, event integrity after Abnormal disconnect

Built-in 4G/3G module
Support remotely monitor & data
transmission

Built-in Wifi module
Support AP/Station mode one-key swift
AP mode can support 5 devices to share
Internet access. Station mode support
data automatic uploading and backup

Host integrate emergency alarm button
Achieve one-key alarm or capture function
