The screenshot shows a comprehensive monitoring interface. The top bar includes navigation icons for video, map, playback, system settings, log queries, and app extension. The left sidebar lists 12 monitored devices, including various models like '贵C 26562' and '贵C 87762'. The central video area provides real-time feeds from four different camera perspectives within a vehicle. Below the video feeds, a data table tracks device status, including online/offline counts, alarm events, and current location data. The right-hand map displays the vehicle's real-time position on a geographic map, with a detailed information popup for the selected device showing its speed, company, and network status. The bottom status bar provides system performance metrics, such as the number of online devices and any data loss or arrears.
